

# CHASE LIGHTING FIXTURES.....

FOR  
THE HOME  
OF TODAY

Folder No. 10

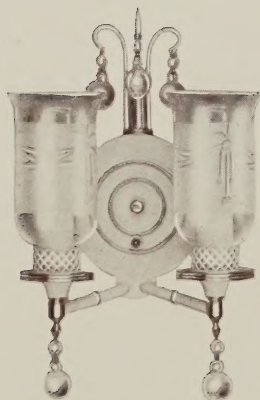

**T**HIS folder shows only a part of the complete line of Chase Residential Lighting Fixtures. It illustrates the character, grace and beauty of Chase fixture designs. Also the variety of styles and of fixtures available for every room in the home.

These beautiful Chase fixtures are not expensive. The metal parts are made of beautifully finished Brass or Copper.

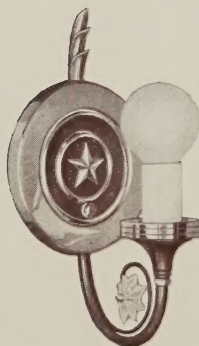

For your protection, practically all Chase fixtures bear the label of approval of the National Board of Fire Underwriters.

Let your local Chase dealer quote you prices and help you select the correct fixtures for your home. If you cannot easily locate a Chase dealer, go to your own Electrical dealer or write direct to us for the name of the nearest dealer.

# Chase "EVEN-GLOW"\*

\*Trade Mark Reg. U. S. Pat. Office

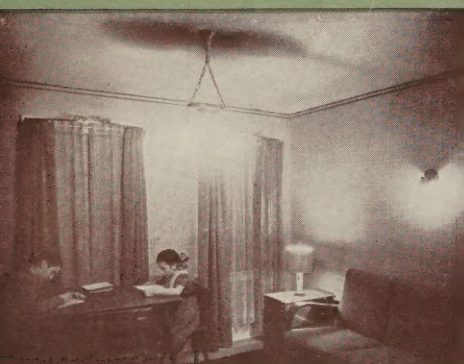

Give

**BEFORE:** This is a room improperly lighted with ordinary lighting fixtures.

**AFTER:** This is the same room with Chase "Even-Glow" fixtures that give scientific, diffused light.

**BEFORE:** Excessive glare, as shown in this room, is a strain on the eyes of school children at study.

**AFTER:** Here's the same room properly lighted with Chase "Even-Glow" fixtures. No semi-darkness, no eye-irritating bright spots.

## The Wrong Kind of Light is Harmful

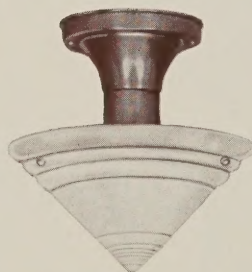

A large percentage of defective eyesight is caused by improper lighting in the home. Excessive glare from the old type cluster fixtures that have exposed bulbs, means discomfort and eyestrain. Constant glare, inadequate light, too much of the wrong kind of light and extreme contrasts from bright to dark areas, not only injures your eyes but also causes headaches, nervousness, fatigue and other ills.

## Scientific Diffused Light Saves Eyesight

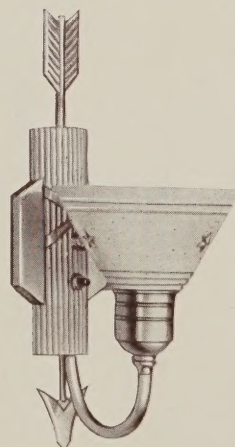

The new Chase "Even-Glow" Fixtures give scientific diffused light. The light is directed to the ceiling from where it is evenly reflected throughout the room. It is a pleasing, glareless light which is comfortable and easy on the eyes. A single bulb in a Chase "Even-Glow" Fixture will give you 57% more light than several small bulbs in an old type fixture using the same amount of current. The bowls of these fixtures are made of a Plastic material which is extremely durable and much safer to use than glass.

## Where to Buy

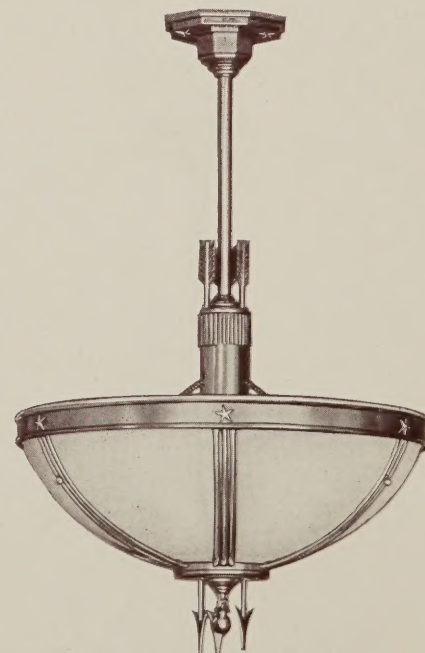

The Chase Lighting Fixture dealer in your locality will be glad to tell you more about these Chase "Even-Glow" Fixtures. Ask him to show them to you and tell you the size of the bulb recommended for each fixture. If you cannot locate the Chase Dealer, go to your own Electrical dealer or write to us for the name of our dealer, and our new booklet "Saving your eyes with Correct Lighting."

**No. 1574.** One-light ceiling fixture with an 8" Plastic reflector. Height 9". Finishes: English Bronze, Toned Pewter.
